EDUCATION

B.S. COMPUTER SCIENCE, Grand Valley State University ---------- ***Expected May 2026***

WORK EXPERIENCE

| **Dematic,** Software Engineering Intern ---------- ***May 2025 - Present***

- Implement system and performance testing in Java, designing and running test cases to evaluate functionality and reliability.
- Bridge software with firmware and hardware on the commissioning team, troubleshooting integration issues across embedded systems.
- Debug and maintain a large multicontainer codebase (Docker/Kubernetes), resolving failures and improving deployment stability.

| **GVSU IT Services Helpdesk,** Student Worker ---------- ***September 2024 - May 2025***

- Provide technical support to students, faculty, and staff, troubleshooting software and network issues.
- Assist with system maintenance, account setups, and ticket resolutions in a fast-paced environment.

| **Goldfish Swim School Grandville,** Deck Supervisor / Swim Instructor ---------- ***May 2023 - May 2025***

- Supervise, train, and mentor a team of 4-8 swim instructors to run lessons for kids aged 0 to 12.
- Provided exceptional customer service by addressing parent and student concerns, ensuring patron satisfaction and retention.

PROJECTS

| **Nowhere Collective Trashy Marketplace,** Senior Project / Capstone ---------- ***September 2025 - Present***

Objective: Rebuild an MVP for the client using a better tech stack.

- Built a marketplace web application using Next.js, React, TypeScript, and Firebase for real-time offers and messaging.
- Developed reusable component library with Tailwind CSS and comprehensive Jest/React Testing Library unit tests.
- Deployed production application on Firebase Hosting, managing authentication and data migration from legacy platform.

| **Fishite,** Cloud Computing ---------- ***December 2025***

Objective: Build an Application using 4 or more Cloud services.

- Deployed a real-time multiplayer game server on Google Cloud Run with a Load Balancer for scalable traffic distribution and high availability.
- Implemented event-driven architecture using Cloud Pub/Sub and Cloud Scheduler to trigger periodic game events, enabling automated gameplay mechanics.
- Architected a persistent data storage solution using Cloud Storage to maintain player state and game data across server restarts and deployments.

| **The Simpsons Arcade,** Game Programming ---------- ***March 2025***

Objective: Create and develop a 2-dimensional game implementing game programming methods.

- Implemented a GUI using the Pygame package.
- Integrated player movement logic with sprites using state machines.
- Created a basic AI for enemy games for users to play against.

TECHNICAL SKILLS

Python, C Programming, Java, Linux, Windows, Git, Unity, C#, JavaScript, Typescript, React, HTML, CSS, Docker, Kubernetes, Grafana, Firebase, GCP, SQL, Typescript, C++, MS Excel, Mac OS, Android/iOS, Adobe

ON-CAMPUS INVOLVEMENT

Men's Club Volleyball, *Member / Fundraising Coordinator* ---------- ***September 2021 - May 2025***
CIS Computing Club, *Member* ---------- ***August 2022 - Present***
Datafest Stats Competition, Won *Judges' Choice* ---------- ***April 2024***
K-Pop Group Evolution, *Dance Club Member* ----------***September 2022 - May 2024***
